Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 17 January 2002.
- 2a) This action is FINAL. 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what the claims encompass from "means" claimed.

The means for selecting first still picture management information, second still picture management, third still picture management information and forth still picture management information is not clear. The "means" for selecting is not defined, the scope of the claim limitation is not specify in specification or the claim; and a person of ordinary skill in the art cannot determine what the applicant intended. Also the term "substantially" in the claim is not defined clearly. There is also no clarification in the disclosure to this term. The sequence of recording in still picture with or without audio cannot be determine. Therefore the metes and bounds of the claim cannot be determined.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 rejected under 35 U.S.C. 102(b) as being anticipated by Hirayama et al. (US 5652824).

Regarding claim 1, the claim drawn to a recording apparatus for recording one or more still pictures and still picture group management for managing one or more still picture as still picture group on to a storage medium comprising; a memory storing and means for recording still picture group management information in to storage medium; means, when still picture with no audio recorded, for selecting **first still picture management information** on still picture with no audio to be reproduced in synchronism with the reproduction of still picture, **selecting second still picture management information** when original audio and still picture recorded, and recording first or second still picture management information in the same order recording corresponding still picture;

means for, when a post-recorded audio to be reproduced in synchronism with the reproduction of the still picture is recorded to the still picture already recorded in the storage medium, if the still picture already recorded has no original audio, replacing **first still picture management information** with the **third still picture management**

information with only post-recorded audio added to the still picture already recorded, if still picture already recorded has the original audio, replacing **second still picture management information** by **fourth still picture management** information on a still picture with both of the original audio and a post-recorded audio added to the still picture already recorded.

Ando et al. teaches a recording apparatus for recording one or more still pictures and still picture group management for managing one or more still picture as still picture group on to a storage medium (**column 1 line 9-15**) comprising; a memory storing and means for recording still picture group management information in to storage medium; When still picture with no audio recorded, for selecting first still picture management information on still picture with no audio to be reproduced in synchronism with the reproduction of still picture, selecting second still picture management information when original audio and still picture recorded, and recording first or second still picture management information in the same order recording corresponding still picture;

Means for, when a post-recorded audio to be reproduced in synchronism with the reproduction of the still picture is recorded to the still picture already recorded in the storage medium, if the still picture already recorded has no original audio, replacing first still picture management information with the third still picture management information with only post-recorded audio added to the still picture already recorded, if still picture already recorded has the original audio, replacing second still picture management

information by fourth still picture management information on a still picture with both of the original audio and a post-recorded audio added to the still picture already recorded (column 6 line 16-67 and column 7 line 1-6).
